

# **SAFETY DATA SHEET**

### 1. Identification

Product identifier BARIUM NITRATE, REAGENT (ACS)

Other means of identification

Product code 858

**Recommended use** professional, scientific and technical activities: other professional, scientific and technical activities

**Recommended restrictions** None known.

Manufacturer/Importer/Supplier/Distributor information

**Manufacturer** 

**Company name Address**GFS Chemicals, Inc.
P.O. Box 245
Powell, OH 43065

United States

**Telephone** Phone 740-881-5501

Toll Free 800-858-9682 Fax 740-881-5989

Website www.gfschemicals.com
E-mail service@gfschemicals.com

**Emergency phone** Emergency Assistance Chemtrec 800-424-9300

number

# 2. Hazard(s) identification

Physical hazardsOxidizing solidsCategory 2Health hazardsAcute toxicity, oralCategory 4Serious eye damage/eye irritationCategory 2ASpecific target organ toxicity, repeatedCategory 2

exposure

**Environmental hazards**Not classified. **OSHA defined hazards**Not classified.

**Label elements** 

Signal word Danger

**Hazard statement** May intensify fire; oxidizer. Harmful if swallowed. Causes serious eye irritation. May cause damage

to organs through prolonged or repeated exposure.

**Precautionary statement** 

**Prevention** Keep away from heat. Do not breathe dust. Do not eat, drink or smoke when using this product.

Wear protective gloves/eye protection/face protection.

**Response** IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth. If in

eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If skin irritation

occurs: Get medical advice/attention.

**Storage** Store away from incompatible materials.

**Disposal** Dispose of contents/container to an appropriate treatment and disposal facility in accordance with

applicable laws and regulations, and product characteristics at time of disposal.

Hazard(s) not otherwise

classified (HNOC)

None known.

**Supplemental information** None.

Material name: BARIUM NITRATE, REAGENT (ACS)

### 3. Composition/information on ingredients

Substances

858 Version #: 01 Revision date: Issue date: June-10-2015 1 / 7

**Chemical name** Common name and synonyms **CAS** number % **BARIUM NITRATE** 10022-31-8 100

### 4. First-aid measures

Inhalation If dust from the material is inhaled, remove the affected person immediately to fresh air. Call a

physician if symptoms develop or persist.

Skin contact IF ON CLOTHING: rinse immediately contaminated clothing and skin with plenty of water before

removing clothes. Wash off with soap and water. Get medical attention if irritation develops and

persists.

Do not rub eyes. Immediately flush eyes with plenty of water for at least 15 minutes. Remove **Eye contact** 

contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation

develops and persists.

Ingestion Rinse mouth. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

Get medical advice/attention if you feel unwell.

Most important

symptoms/effects, acute and delayed

Upper respiratory tract irritation. Skin irritation. Prolonged exposure may cause chronic effects.

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

**Indication of immediate** medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Keep victim warm. Keep victim

under observation. Symptoms may be delayed.

**General information** Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse.

### 5. Fire-fighting measures

Suitable extinguishing media

**Unsuitable extinguishing** media

Carbon dioxide (CO2).

Specific hazards arising from

the chemical

During fire, gases hazardous to health may be formed. Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

**Special protective equipment** and precautions for firefighters

Fire fighting equipment/instructions

**Specific methods** General fire hazards In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do

Greatly increases the burning rate of combustible materials. Containers may explode when heated.

so without risk. Use water spray to cool unopened containers.

Cool containers exposed to flames with water until well after the fire is out. May intensify fire; oxidizer. Contact with combustible material may cause fire.

### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Do not breathe dust. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Shovel the material into waste container. If sweeping of a contaminated area is necessary use a dust suppressant agent which does not react with the product. Collect dust using a vacuum cleaner equipped with HEPA filter. Minimize dust generation and accumulation. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water.

Small Spills:

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Wear appropriate protective equipment and clothing during clean-up.

**Environmental precautions** Avoid discharge into drains, water courses or onto the ground.

858 Version #: 01 Revision date: Issue date: June-10-2015 2/7

Material name: BARIUM NITRATE, REAGENT (ACS)

<sup>\*</sup>Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

### 7. Handling and storage

**Precautions for safe handling** Keep away from heat. Provide appropriate exhaust ventilation at places where dust is formed.

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from clothing and other combustible materials. Take any precaution to avoid mixing with combustibles. Do not breathe dust. Avoid contact with eyes. Avoid prolonged exposure. Do not taste or swallow. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Keep away from heat. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Store away from incompatible materials (see Section 10 of the SDS).

## 8. Exposure controls/personal protection

### **Occupational exposure limits**

**US. NIOSH: Pocket Guide to Chemical Hazards Material Value Type** BARIUM NITRATE (CAS TWA 0.5 mg/m3 10022-31-8)

No biological exposure limits noted for the ingredient(s).

**Biological limit values** 

**Appropriate engineering** controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure

limits have not been established, maintain airborne levels to an acceptable level. Ventilation should be sufficient to effectively remove and prevent buildup of any dusts or fumes that may be generated during handling or thermal processing. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable

respiratory protection must be worn. Provide eyewash station.

### Individual protection measures, such as personal protective equipment

**Eye/face protection** Chemical respirator with organic vapor cartridge, full facepiece, dust and mist filter.

Skin protection

**Hand protection** Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove

supplier. Frequent change is advisable.

Other Wear suitable protective clothing. Use of an impervious apron is recommended.

Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels Respiratory protection

exceeding the exposure limits. Chemical respirator with organic vapor cartridge, full facepiece, dust

and mist filter.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

**General hygiene** considerations

Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Keep away from food and drink. Always observe good personal hygiene

measures, such as washing after handling the material and before eating, drinking, and/or smoking.

Routinely wash work clothing and protective equipment to remove contaminants.

# 9. Physical and chemical properties

Crystals **Appearance** Solid. **Physical state** Powder. **Form** Color White. Odor Not available. **Odor threshold** Not available. Not available. pН Melting point/freezing point 1094 °F (590 °C) Initial boiling point and Not available.

Molecular formulaBa(NO3)2Molecular weight261.34 g/molSpecific gravity3.24 at 23 °C

# 10. Stability and reactivity

**Reactivity** Greatly increases the burning rate of combustible materials.

**Chemical stability** Material is stable under normal conditions. **Possibility of hazardous** Hazardous polymerization does not occur.

reactions

**Conditions to avoid** Heat. Contact with incompatible materials. Avoid dispersal of dust in the air (i.e., clearing dust

surfaces with compressed air).

**Incompatible materials** Acids. Combustible material. Reducing agents. Aluminum.

**Hazardous decomposition** 

products

No hazardous decomposition products are known.

### 11. Toxicological information

## Information on likely routes of exposure

**Inhalation** May cause damage to organs through prolonged or repeated exposure by inhalation. Inhalation of

dusts may cause respiratory irritation. Prolonged inhalation may be harmful.

**Skin contact** No adverse effects due to skin contact are expected.

**Eye contact** Causes serious eye irritation. Dust in the eyes will cause irritation.

**Ingestion** Harmful if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred

vision. Upper respiratory tract irritation. Skin irritation.

#### Information on toxicological effects

**Acute toxicity** Harmful if swallowed.

Product	Species	Test Results
BARIUM NITRATE (CAS 10022-31-	3)	
Acute		
Oral		
LD50	Rat	355 mg/kg
Other		
LD50	Mouse	20.1 mg/kg
		8.49 mg/kg
LDL0	Mouse	8.5 mg/kg

<sup>\*</sup> Estimates for product may be based on additional component data not shown.

**Skin corrosion/irritation** Prolonged skin contact may cause temporary irritation.

Material name: BARIUM NITRATE, REAGENT (ACS)

858 Version #: 01 Revision date: Issue date: June-10-2015 4 / 7

Serious eye damage/eye

irritation

Causes serious eye irritation.

Respiratory or skin sensitization

**Respiratory sensitization** Not available.

Skin sensitization This product is not expected to cause skin sensitization.

Germ cell mutagenicity No data available to indicate product or any components present at greater than 0.1% are

mutagenic or genotoxic.

This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. Carcinogenicity **Reproductive toxicity** This product is not expected to cause reproductive or developmental effects.

Specific target organ toxicity

- single exposure

Not classified.

Specific target organ toxicity

- repeated exposure

May cause damage to organs through prolonged or repeated exposure.

**Aspiration hazard** Not available.

**Chronic effects** Prolonged inhalation may be harmful. May cause damage to organs through prolonged or repeated

exposure.

12. Ecological information

**Ecotoxicity** The product is not classified as environmentally hazardous. However, this does not exclude the

possibility that large or frequent spills can have a harmful or damaging effect on the environment.

No data is available on the degradability of this product. Persistence and degradability

**Bioaccumulative potential** No data available. Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation

potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

**Disposal instructions** Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of

contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code The waste code should be assigned in discussion between the user, the producer and the waste

disposal company.

Waste from residues / unused products

Dispose of in accordance with local regulations. Empty containers or liners may retain some product

residues. This material and its container must be disposed of in a safe manner (see: Disposal

instructions).

Empty containers should be taken to an approved waste handling site for recycling or disposal. Contaminated packaging

Since emptied containers may retain product residue, follow label warnings even after container is

emptied.
